

Amdro[®] Granular Ant Bait

No queen. No colony.

An effective granular bait insecticide that controls ants the only sure way - by eliminating the Queen

- Carried by worker ants into the nest and consumed by the queen to achieve complete colony elimination
- Highly palatable bait matrix attractive to target species
- Low toxicity to non-target species and able to be used in sensitive areas where traditional insecticide sprays are not suitable
- Powerful on target ants, including the queen, at low dose/bait rates
- Approved for use on gardens, lawns, parks, golf courses, sports grounds, driveways, paths, patios and other non-crop land

Amdro[®] Granular Ant Bait

Insecticide

No queen. No colony.

While the queen ant lives, the colony can be rebuilt. Amdro[®] Granular Ant Bait is carried back into the nest as food and shared with other ants, including the queen. This ensures control of the whole ant colony. While fast acting to ants including specific destructive ant species, namely Singapore Ant, Coastal Brown Ant, Tropical Fire Ant (Ginger Ant), Red Imported Fire Ant and Green-head Ant, Amdro[®] Granular Ant Bait has a relatively low toxicity to humans and other mammals.

Situation	Pest	Rate	Critical Comments
Gardens, golf courses, Industrial areas, lawns, parks, turf, sports grounds and other non-crop land and non-food bearing nursery stock.	Singapore ant (<i>Monomorium destructor</i>) Costal brown ant (<i>Pheidole megacephala</i>) Tropical fire and or Ginger ant (<i>Solenopsis</i> <i>geminata</i>) Greenhead ant (<i>Rhytidoponera spp</i>) Red imported fire ant (<i>Solenopsis invicta</i>)	2.5 kg/ha or 5 g/20m²	 Broadcast method (all ant types): Evenly distribute granules over infested area using a hand held rotary granule spreader or equivalent applicator or gloved hand. Individual mound treatments (Red imported fire ant): This treatment method should be used when fast control is required, desirable ant species are present throughout the treatment area and there are less than 50 fire ant nests or colonies per hectare. Sprinkle 50 g (approximately 5 tablespoons) of product immediately around each mound. Apply in late afternoon when ants are active. Re-treat when ant activity becomes troublesome again. See GENERAL INSTRUCTIONS on label for description of ants.

Refer to the product label for full directions and use table.

Packaging

Pack size 454g.
